

We will expand the circle of contribution that links to society and to the future.

Ideal

Local communities and Japanese society

▶▶▶ We will coexist and cooperate with local communities and help foster the coming generations that will develop and handle future dream technologies.

International community

▶▶▶ We will respect the cultures of the various countries of the world and contribute to their prosperity by fostering their technology and human resources.

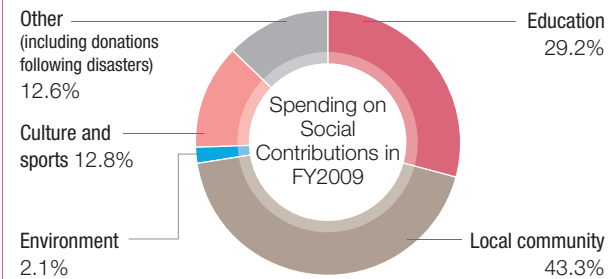

Social Contribution Expenditures

Spending on Social Contributions in FY2009

The KHI Group has been a member of the Japan Business Federation's 1% Club since it was inaugurated in 1990.

The purpose of the club is to try to make voluntary expenditures equivalent to at least 1% of ordinary income for social contribution, although the KHI Group exceeds this target in typical years.

Our expenditures include a variety of monetary contributions as well as voluntary programs like management of our corporate museum Kawasaki Good Times World, the holding of miscellaneous events, especially for children, cooperation for the advancement of the local community and a corporate forest restoration program.

Teaching Children at Kawasaki Good Times World

The KHI Group Contributes to the Education of Young People

In May 2006, we opened Kawasaki Good Times World, our corporate museum. The goal of this museum is to allow as many people as possible to experience the "wonders of technology" and the "importance of craftsmanship." We also established this facility in order to deepen communication with members of the community. Starting with our history of over 110 years and accurately showing changes through the eras, we introduce our representative products for the land, sea and air that have contributed to the development of society with our leading-edge technologies.

The Kawasaki Good Times World museum also holds various events and other programs as a part of our efforts to communicate with the local community as well as to foster the next generation.

Parent and Child Summer Vacation Workshop

The workshop took place in August 2009. Thirty families built propeller airplanes after applying on the Kawasaki Good Times World website.

Kawasaki BK117 Helicopter Rides

Over two days in July 2010, about 650 guests chosen by lottery from visitors to Kawasaki Good Times

World experienced the thrill of five-minute rides over Kobe. The event also included a workshop on making paper whirlybirds.

Seventh Model Train Event

Our regular model train event was held in March 2010. More than 3,800 visitors attended over two days. Children and their parents enjoyed doing paper crafts at the event site.

Providing an Off-Campus Learning Place for Kobe City Elementary Schools

Many elementary school students have visited Kawasaki Good Times World as an off-campus learning environment, and gained an interest in our products, technologies and craftsmanship as a result.

"Social Seats" for "Vissel Kobe" J1 Soccer Club

Hoping to help young people grow in good health and to boost regional development by sports, we have officially supported the "Vissel Kobe" J. League Division 1 soccer club since the team's inception in 1995.

© Vissel Kobe

We also contribute to social welfare and promote sports by offering "social seats" at Vissel Kobe home games for orphans of Great Hanshin Awaji earthquake and children living in institutions.

Exhibit at "Science Fair in Hyogo"

"Widen Your Circle, Find Your Future"

Six "Super Science High Schools" from Hyogo Prefecture hosted the "Second Science Fair in Hyogo," where high school students present their scientific research. The KHI Group joined the fair and introduced our products and technologies for high school students.

Taking this kind of opportunities, we will contribute to fostering next generations using our resources of "treasure box of science."

Scholarships for Human Resources Development in China

Our Plant & Environment Company operates two joint ventures in Wuhu City, Anhui Province, China: Anhui Conch Kawasaki Engineering Co., Ltd. (ACK) and Anhui Conch Kawasaki Energy Conservation Equipment Manufacturing Co., Ltd. (CKM). Based on the agreement with our partner Anhui Conch Venture Investment Company, we have donated one million yuan to Wuhu City as scholarships each year since FY2008 through our joint ventures. These funds are used as scholarships for exceptional students in Wuhu City to promote human resources development there.

Lifesaving with AEDs

Three members of Kawasaki Precision Machinery (now the Precision Machinery Company) received the city of Kobe's "Flower Clock Award" in July 2010 for saving a man's life.

In April of this year, the man, an employee of a business partner, suddenly collapsed in the works of Kawasaki Precision Machinery in Nishi-ku, Kobe. Our employees discovered him in a state of cardiopulmonary arrest. They immediately called 119 and worked together to accurately and effectively apply CPR and use an AED stationed nearby to defibrillate his heart, thus saving his life.
